

POSITIVE THINKING

April 2009

Conference News

Aloha Focus 2009

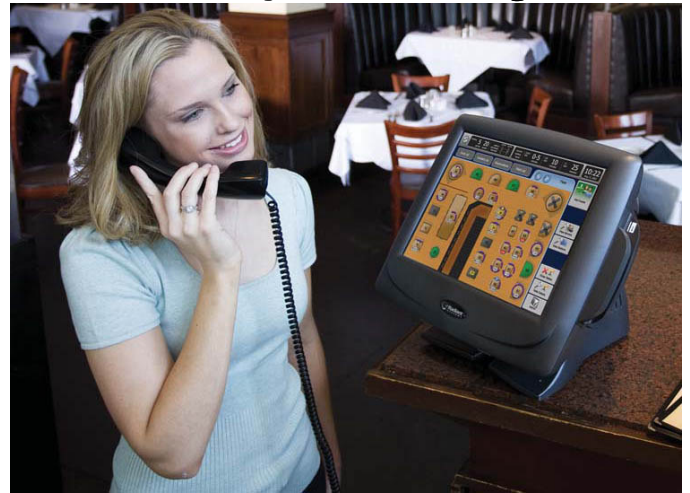

Focus is an annual event that brings together industry leaders, strategic business partners and Radiant Channel Partners for educational sessions and networking. This year the event was held at Westin Kierland Resort in Scottsdale, Arizona from February 15 – February 19 and was attended by our very own Aaron Anselmo. Aaron attended workshops and presentations to see Aloha & Radiant’s 2009 product roadmap strategy. While in attendance, he even picked up an award!

We would like to thank all our valued customers for your continued patronage. We feel this award is a direct reflection of your commitment to SCR!

Product Feature

Aloha Guest Manager

Radiant Systems is proud to announce the general release of Aloha Guest Manager in the US and Canada. Providing a memorable guest experience helps set restaurant operators apart from their competition and keeps customers coming back. Aloha Guest Manager enables restaurant operators to enhance their guest experience - from the simple act of taking a reservation over the phone to guest interaction at the host stand to getting seated quickly with an accurate wait time.

Aloha Guest Manager offers reservation management, waitlist management, table management and guest tracking. The software intelligently tracks table status, reduces the time tables are left unseated, maximizes seating efficiency and captures key guest information to help provide personalized service.
